

#### Notes for Completion

Where an In-Scope Organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required at the selection stage to submit a Carbon Reduction Plan which details their organisational carbon footprint and confirms their commitment to achieving Net Zero by 2050.

Carbon Reduction Plans are to be completed by the bidding supplier<sup>1</sup> and must meet the reporting requirements set out in supporting guidance, and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve Net Zero emissions by 2050.

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a Carbon Reduction Plan covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard<sup>2</sup> and Guidance<sup>3</sup>, and all of the following criteria are met:

- The bidding entity is wholly owned by the parent;
- The commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity;
- The environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract; and
- The CRP is published on the bidding entity's website.

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's Carbon Reduction Plan may only be a temporary measure under this selection criterion.

The Carbon Reduction Plan should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the key objectives of the Carbon Reduction Plan within their strategic plans.

A template for the Carbon Reduction Plan is set out below. Please complete and publish your Carbon Reduction Plan in accordance with the reporting standard published alongside this PPN.

<sup>3</sup>Guidance can be found at:

<sup>&</sup>lt;sup>1</sup>Bidding supplier or 'bidding entity' means the organisation with whom the contracting authority will enter into a contract if it is successful.

# **Carbon Reduction Plan Template**

Supplier name: Athona Ltd

Publication date: 11/12/2023

# **Commitment to achieving Net Zero**

Athona Ltd is committed to achieving Net Zero emissions by 2050.

### **Baseline Emissions Footprint**

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

#### Baseline Year: 2023 (Reporting period Oct 2022 to Oct 2023)

Additional Details relating to the Baseline Emissions calculations.

2023 (Reporting Period Oct 2022 to Oct 2023) is our Baseline Emissions year as this is the first year of data capture and calculation, therefore the Baseline Emissions and Current Emissions are the same. We have followed the GHG Protocol's Corporate Standard and our operational emissions boundary and calculations are based on Financial Control. The 2023 GHG Conversion Factors have been used to calculate emissions.

Scope 1:

Company Facilities: Includes Gas and Electricity Usage and Air Conditioning Servicing.

Company Vehicles: We do not have any company fleet vehicles.

Scope 2:

Gas and Electricity Generated

Scope 3:

Narrative:

\*This is a service-based business with no physical products being manufactured / transported.

\*\*This is an office-based business with no formal waste monitoring due to shared waste facilities with other businesses in the premises and negligible emissions arising from waste generated.

\*\*\*Employee commuting survey yielded 66% response rate, the survey data has been averaged to 100% and provided as a calculated estimate for the baseline year.

\*\*\*\* Downstream transportation and distribution = temporary workers commuting to clients, the total tCO2e has been estimated using the same average commuting data as employee commuting x number of temporary workers as a baseline estimate until data capture can be improved.

Baseline year emissions: 2023		
EMISSIONS	TOTAL (tCO2e)	
Scope 1	130.52 (Gas and Electricity usage and air con refrigerants – we do not have any company fleet vehicles)	
Scope 2	124.94 (Gas and Electricity Generated)	
Scope 3	791.71	
(Included Sources)	4. Upstream transportation and distribution* = 0	
	5. Waste generated in operations** = 0	
	6. Business travel (Car, Bus, Train, Air Travel) = 39.76	
	7. Employee Commuting *** = 98.75	
	Employee teleworking = 4.84	
	9. Downstream transportation and distribution **** = 648.36	
Total Emissions	1047.17	

# **Current Emissions Reporting**

Reporting Year: 2023 (Reporting period Oct 2022 to Oct 2023)		
EMISSIONS	TOTAL (tCO₂e)	
Scope 1	130.52 (Gas and Electricity usage and air con refrigerants – we do not have any company fleet vehicles)	
Scope 2	124.94 (Gas and Electricity Generated)	
Scope 3	791.71	
(Included Sources)	<ul> <li>4. Upstream transportation and distribution* = 0</li> <li>5. Waste generated in operations** = 0</li> </ul>	

	6. Business travel (Car, Bus, Train, Air Travel) = 39.76
	7. Employee Commuting *** = 98.75
	Employee teleworking = 4.84
	9. Downstream transportation and distribution **** = 648.36
Total Emissions	1047.17

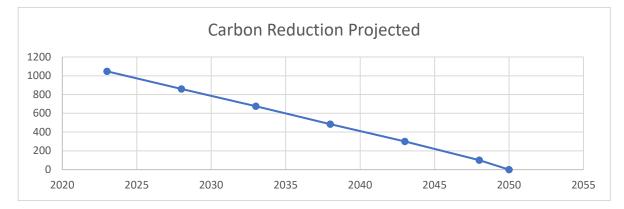

#### **Emissions reduction targets**

This is our first carbon reduction plan, in order to achieve Net Zero by 2050, we have adopted the following carbon reduction targets:

By targeting the three main sources of emissions within our organisational control it will make the most impact and produce the quickest reduction in emissions:

- Encourage the reduction of temporary worker commuting emissions through improved data capture and awareness of the impact of their travel choices, promoting more sustainable forms of transport through available schemes and behaviour modification.
- Further reducing use of gas and electricity within our office premises, by adopting further technological controls and behaviour modification through education of emissions impact with our employees.
- To further reduce Business Travel using vehicles, instead opting first for online meetings and second using public transport as the main source of travel.

We project that carbon emissions will decrease over the next five years to  $860.17 \text{ tCO}_2\text{e}$  by 2028. This is a reduction of 17.86% The Carbon Reduction Initiatives and targets will be reset every 5 years to ensure we can achieve Net Zero by 2050.

Projected progress against these targets can be seen in the graph below:

# **Carbon Reduction Projects**

#### **Completed Carbon Reduction Initiatives**

The following environmental management measures and projects will be implemented from the 2023 baseline. The carbon emission reduction projected by these schemes equate to 187 tCO<sub>2</sub>e, a 17.86 %ge reduction against the 2023 baseline by 2028 and the measures will be in effect when performing the contract. The Carbon Reduction Initiatives and targets will be reset every 5 years to ensure we can achieve Net Zero by 2050.

We are currently in the process of adopting the ISO14001 Environmental Management System and hope to have accreditation by 2024.

We are reviewing our business travel policy to opt for online meetings in the first instance and secondary to use public transport as the default method of transport.

We are developing reporting tools to monitor and share emissions data and awareness of its impact to increase adoption of emissions reduction schemes throughout the business.

We will adopt a companywide 'Switch Off' campaign to ensure all electrical devices are switched off out of hours.

We have retained a hybrid working environment since Covid 19 allowing staff flexibility to work from home for part of the week.

We have removed disposable items i.e. plastic and paper cups providing reusable items only.

We will encourage car sharing wherever possible and during the summer months promote a cycle to work scheme.

We have been mindful of reductions in emissions through adoption of a number of energy saving measures since relocating to our current premises in December 2018. We ensured as part of the design that PIR sensors and LED lighting was installed throughout the building to save on energy consumption.

In 2018 we also introduced print release software to reduce wasted printing by requiring employees to physically key in a passcode at the printer to release their printing, rather than sending it to the printer and forgetting it which has significantly reduced paper and printer usage, therefore reducing consumables and waste.

Whilst very minimal, we have always opted for recycling schemes for WEEE equipment and the use of certified shredding for confidential waste ensuring that the waste is recycled. We will continue to use certified schemes that recycle office waste rather than sending to landfill.

### **Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>4</sup>

<sup>&</sup>lt;sup>4</sup><u>https://ghgprotocol.org/corporate-standard</u>

and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>5</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>6</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

#### Signed on behalf of the Supplier:

SAnthony
